

Yamaha FZ1 / FAZER (2006)

Racing & Evolution Exhaust System

Akrapovic Racing & Evolution Exhaust System

for the Yamaha FZ1 / FAZER (2006)

We offer Akrapovic Racing and Evolution systems with a HEXAGONAL muffler to complement the aggressive lines of the Yamaha. The systems differ only in their selection of materials, while both offer the same performance injection guaranteed to satisfy all racing-oriented riders. The Street Legal versions of the systems come with noise dampers and are approved for street use.

PERFORMANCE

Measurements of the Akrapovic EVOLUTION system on the YAMAHA FZ1 (with-out muffler insert):

Power & Torque: the Akrapovic Racing and Evolution systems make the engine massively more responsive, as is clearly visible from the power and torque curves. Both max. power of 146 HP and max. increased power of 10.7 HP were measured at 11200 rpm.

CONFIGURATION

The Akrapovic Racing and Evolution systems are composed of conical header tubes, cylindrical collectors and conical link pipes. They differ only in material selection, with the Racing made out of stainless steel and the Evolution out of titanium. The tubes are attached to each other using sleeve joints secured with silicon-shielded springs. The muffler for both systems is the HEXAGONAL design, with the inlet cap, perforated inner sleeve and outer sleeve made of titanium, with a carbon fiber outlet cap. It is attached to the frame using an Akrapovic carbon fiber clamp. The systems also include a fitting for attaching a lambda sensor. The Street Legal versions include a noise damper installed in the muffler.

	PERFORMANCE		
	stock	AKRAPOVIC	max. increased power
max. rear wheel power HP / rpm (measured on SuperFlow Cycle Dyn)	135.3 / 11200	146 / 11200	10.7 / 11200
