

HONDA CB 1300
RACING EXHAUST SYSTEM

The Akrapovic SPORT PRODUCTION exhaust system is the first level in our range of complete exhaust systems, which totally replace the stock systems. The configuration for the Honda CB 1300 is 4-2-1.

The tubes for Akrapovic SPORT PRODUCTION exhaust systems are made of high-quality stainless steel, whose polish makes them match the lines of naked bikes beautifully ‡ including the mighty Honda. The header tubes are cylindrical, as is the link pipe in the case of the Honda. The component parts are attached to each other through the use of free-floating joints which are secured using high-quality silicon-shielded tensioning springs.

At the back is the familiar Akrapovic oval-section muffler, held in place using the Akrapovic carbon-fiber clamp, which is ideally suited to its task of minimizing vibrations and unwanted movement. The outer sleeve of the muffler is available in either the racing-style black woven pattern of carbon-fiber or the refined satin sheen of titanium. There is no difference in performance between the two materials, nor does the choice affect the sound. It's simply a matter of your aesthetic choice of which one fits the lines of the Honda better. We also pay special attention to guaranteeing the minimal weight of our systems. Therefore all metal parts in the interior of the muffler are made exclusively of titanium. The weight savings of over 48% over the stock exhaust attests to the quality of the materials and the precision manufacturing of the system.

Measurements of the Akrapovic SPORT PRODUCTION system on the Honda CB 1300:

• power:

If we achieved a good result with the Slip-On system, then it would be logical to conclude that the results with the SPORT PRODUCTION system should be even better. With this exhaust system your engine will offer a full 14 HP more than the stock system, which means that at 8000 rpm the rear wheel will receive 121.3 HP. The shape of the power curve essentially follows the stock curve, but the increased power puts the curve much higher up on the graph.

If you are looking to tune up the exhaust system of your CB 1300, the Akrapovic SPORT PRODUCTION system is definitely an excellent choice. The proof lies in the major performance increase, the significant weight savings and the aesthetic and sonic enhancement offered by a renowned brand name.

PERFORMANCE			
	stock	AKRAPOVIC	max. increased power
max. rear wheel power HP / rpm (measured on Dynojet ATV)	107.3 / 7750	121.3 / 8000	14.5 / 7800

ADDITIONAL DATA					
weight comparison (kg)	stock	AKRAPOVIC		difference	
	10.68	RACING	EVOLUTION	stock - RACING	stock - EVOLUTION
		5.5	-	5.18	-

noise measurements (dB / rpm)	stock	AKRAPOVIC
		87.2 / 3750
legal for street use	NO
