

Downpipe (Titan)

Produkt-Code: DP-MIT/T/1

Owners of tuner cars are always looking for more power. Well, the Akrapovič systems do not disappoint. The Evolution system with the optional down pipe produces over 31 horsepower more than stock, while at the same time reducing weight by an amazing 16 kg! Our designs will allow “tuned” cars to realize even more substantial gains. Couple this with a much deeper, more aggressive, and drone-free exhaust note and you have a perfect package.
